PROFILE

Courteous and enthusiastic, I am interested in IT and its world in entirety. I am a team-spirited and self-motivated frontend developer with proven and tested designing, development, testing and communication skills. With a passion for both personal growth and technology development, I possess a strong knowledge of the link between theory and practice from well-known research-based institution and a proven ability to collaborate effectively with senior developers to develop responsive web apps while spending more time to be mentored. I am detail oriented and seek to advance my knowledge in technology development and services and ready to apply my passion for programming to a talented team to develop quality solutions.
